(54) Title: APPARATUS AND METHOD FOR TARGET ORIENTED LAW ENFORCEMENT INTERCEPTION AND ANALYSIS

(57) Abstract: An apparatus and method for capturing, processing and analyzing multiple communication items, related to a hierarchy consisting of cases, sub-cases, targets or interception criteria associated with a law enforcement organization. The apparatus and method allow a user to define the hierarchy, receive and process communication items, display the content, meta data, external or additional data related to the communication items or to a target. The apparatus comprises one or more front end units responsible for filtering and capturing communications, and one or more back end units which allow the processing and presentation of the communications.
